

KLIFO Graduate Programme

Clinical Supply Manager

Your career in life sciences starts here

Innovation, discovery, impact

Advances in medicines, treatments and technology profoundly impact patients, their families and communities worldwide.

Discovery drives breakthroughs faster than ever in the pharmaceutical and biotechnology sectors. These sectors require people with an agile mindset, a thirst for knowledge, and a willingness to explore novel approaches to solving complex problems.

A career in life sciences is your opportunity to work in an ever-evolving industry, harnessing creativity and ingenuity while contributing to solving some of the world's most pressing healthcare challenges.

If you're a recent science or healthcare graduate inspired by the opportunities offered in the biotech, life sciences and pharmaceutical industries, the KLIFO Graduate Programme: Clinical Supply Manager training is a critical step towards establishing your future career.

"I have felt supported, encouraged and motivated by the fast-track approach to learning and developing my professional skills. Just one year in, I am equipped with the skills to navigate the dynamic world of clinical trial supply management."

Mads Norking
Clinical Supply Manager - MSc. Life Science (Human Physiology)

Launch your career with us

The KLIFO Graduate Programme offers a combination of theoretical learning and practical training to equip participants with the necessary skills to launch a career in life sciences.

What you can expect

You will benefit from rapid on-the-job training and an immersive introduction to our dynamic Clinical Trial Supply Solutions team, where you will see first-hand how we turn theoretical knowledge into practical solutions. During the nine-month programme, you will progress through three development phases which will give you valuable experience in Clinical Trial Supply Management and qualify you as a Clinical Supply Manager.

The KLIFO Graduate Programme offers an immediate opportunity to make real contributions. You will work on projects supported by experts in the field and receive mentoring and training to expand your knowledge, gain exposure to industry trends, and develop your critical-thinking skills.

What you will be doing

Our tailor-made programme is designed to build your skills and project management qualities in under a year, helping you develop professionally and reach your full potential. You will gain experience with Good Manufacturing Practice, design and management of supplies for clinical trials, and distribution of investigational medicinal products worldwide.

Learn

Month 1-3

Tailored training will equip you with the knowledge and skills needed to become a Clinical Supply Manager. A mix of professional courses, coaching through dummy studies, and an introduction to the standard operating procedures will prepare you for your further practical education.

Train

Month 4-6

Transition to real-world projects and apply your skills with supervision, guidance and mentoring. Develop hands-on project experience with the clinical supply management team across diverse trials and increase your exposure to developing and deploying custom solutions.

Intern

Month 7-9

Fast-track your progression into a Clinical Trials Supply Management career by gaining valuable experience. Increase your exposure to client relations, develop commercial acumen and build relationships with colleagues and mentors that can open doors to future career opportunities.

Unlock your potential

Our Graduate Programme is a structured and strategic training and development opportunity that equips recent graduates with the specific skills to launch a life sciences career as a Clinical Supply Manager.

The programme offers a highly efficient route for entry into a role traditionally relying on industry experience and on-the-job development. KLIFO is looking for ambitious and talented graduates who thrive on a steep learning curve, enjoy taking responsibility and can quickly contribute to the team's performance.

We believe that getting the best from people comes from collaboration, building trust-based relationships, always listening to our customers' needs and aspirations, and, from there, working to develop a tailor-made solution.

Through the KLIFO Graduate Programme, you will build knowledge in project management and learn what it takes to lead and manage clinical trial supply and logistics activities.

Throughout the programme, you will receive one-on-one mentoring and feedback from managers and colleagues in a learning environment based on trust, passion and flexibility, so you can identify areas of strength and those you want to develop further.

You will get:

- ✓ Experience and knowledge within the life sciences industry
- ✓ A graduation certificate in clinical trial supply
- ✓ Project management skills
- ✓ Advisory and consultancy skills

Pioneer, lead, inspire

At KLIFO, we take pride in advancing drug development with our biotech and pharmaceutical clients.

About us

We are a leading North European, integrated drug development consultancy that partners with pharmaceutical and biotech companies to maximise opportunities, mitigate risks, drive innovation and achieve efficient project advancement.

Our highly qualified team has established a reputation for customisation, expertise and experience in helping our clients develop better drugs faster.

We offer end-to-end solutions across all drug development areas, including strategic project management, regulatory affairs, clinical development, clinical trial supply and non-clinical development and pharmacovigilance in relation to the development of pharmaceutical products.

KLIFO is a team of more than 150 highly skilled colleagues with offices in Denmark, Sweden, Germany and The Netherlands.

Our people have the full breadth of expertise to successfully take our clients' drug development projects from discovery to market. Our experts can help plan, manage and execute drug development projects regardless of the phase, scale, or therapy area.

Step into a rewarding career today

If you're a recent graduate passionate about life science and innovation, the KLIFO Graduate Programme is your gateway to a fulfilling career.
